Subject: AIRPERM ND: REQUEST Coyote Creek Mine (Otter Tail Power)
Attachments: AIRPERM ND OTTER TAIL Coyote Creek for PW 101618.xlsx

Hi, Patrick –

Please see the attached spreadsheet. There is only the one file in FRED for Coyote Creek. That's the one DJ and I looked for down here, but the location in FRED is Distributed so it's possibly in the drawers on 7 you can't currently access. None of the rest mention Creek, but they are the Coyote Station/Power Plant (which is supplied by Coyote Creek coal), so I included them just FYI. There is also a file in CBI that contains a single old document about Otter Tail Minnesota. I included it in case the location is near Coyote Creek. It's a long shot, I know.

I remember when DJ came down to ask initially that Coyote Creek didn't ring a bell. It was odd from the beginning. FRED 113233 says Mike Owens entered it 01/06/2017, but the text wasn't in our standardized format and it's missing the permit number.

Let me know if I can help you further!

Regards,
Amy

Hi, DJ –

Candace came down and after talking with her about the Coyote Creek file, we think it may still be on the 7th floor in a drawer. Although FRED 113233 says 3110 (which was the generic room number for the old RC location), it also said it was Distributed. She is going to pursue this avenue and may have already spoken to you. Just keeping you in the loop.
Amy
